

Understanding IATF 16949:2016

Learn about the requirements of IATF 16949 and how it can be integrated within existing organisational quality management systems on our Understanding IATF 16949 training course.

This practical 1-day course uses interactive workshops to provide delegates with a basic knowledge of the benefits and issues around implementing and maintaining IATF 16949 within the automotive industry.

On completion of the course delegates will have an understanding of the clauses of IATF 16949, and how the standard can support continuing internal improvement.

CERTIFICATES

All delegates will receive a certificate on completion.

Who should attend?

This course is appropriate for:

- those wishing to audit against IATF 16949
- those who will be involved in the implementation and improvement process, including manufacturing and purchasing system managers, quality managers, management representatives, internal auditors and vendor/supplier auditors
- quality managers, management system practitioners and/or process owners, internal and supplier auditors
- senior management wanting an appreciation of changes to the standard

Some delegates find it beneficial to attend this course before taking our [IATF 16949 Internal Auditor](#) or [IATF 16949 Lead Auditor course](#).

We offer a discount of £100 for delegates who book this and one of these auditing courses together. Please contact us if you wish to take advantage of this offer.

It was very good, above my expectations. Tutor managed to break things down with good practical examples.

Johnson Matthey

The way the tutor put things across made it easier to understand how IATF 16949 is to be implemented in our workplace and how we are to use the knowledge.

Hollingsworth & Vose

Key topics

Topics covered by the course include:

- overview of the requirements of IATF 16949 and its relationship with ISO 9001
- the structure (Annex SL), format and features of a process-based management system and how IATF 16949 may be used for business improvement
- outline of the core tools: advanced product quality planning (APQP), failure mode and effects analysis (FMEA), measurement systems analysis (MSA), product part approval process (PPAP) and statistical process control (SPC)
- review of the IATF 16949 clauses
- identifying resources, documentation needs and training
- sources of information and further development

In-company training

Ideal for groups, you can receive this course exclusively for your organisation at your premises or online in our user-friendly Virtual Classroom.

Enjoy cost-effective flexibility and personalised learning with tailored messaging designed to address your unique business challenges. [Contact us for a quote.](#)

Course agenda

Our training courses are designed to optimise the learning experience for delegates both in face-to-face settings and in our Virtual Classroom.

Under the guidance of our expert tutors, attendees will follow an agenda which is briefly outlined below:

- Welcome and Introduction
- Module 1 New Structure and Transition Arrangements
- Module 2 Review of Clauses 1, 2 and 3
- Module 3 Analysis of Clauses 4, 5 and 6
- Module 4 Clause 7: Workshop
- Module 5 Clause 8.1 and 8.2
- Module 6 Clause 8.3
- Module 7 Workshop on Clause 8.4
- Module 8 Tutor led discussion on Clause 8.5 and 8.6
- Module 9 Workshop on Clause 8.7
- Module 10 Clause 9 and 10
- Module 11 Clause Workshop
- Review and close

Skills gained

By the end of this IATF 16949 training course delegates will be able to:

- interpret the basic requirements and principles of IATF 16949 and how they apply to industry processes
- identify areas for internal improvement using IATF 16949
- initiate the process of incorporating the requirements of IATF 16949 within their company with an awareness of resources and skills required

Following the course, a Certificate of Completion will be awarded to those who complete the course, in recognition of their new knowledge and understanding of IATF 16949.

The Tutor was clearly well experienced in all areas, very passionate about his job and past experiences. This made learning from him a joy with the time passing quickly and intently.

AP Racing

The tutor came across as relaxed, friendly and willing to take time to answer any and all questions to the satisfaction of all concerned. The course content was kept light and presented in a friendly manner, keeping all attendees interested and focused.

Amphenol Thermometrics (UK) Ltd

The tutor was very attentive and carried out the whole process very well and kept it interesting by giving his personal experiences where relevant.
